Choosing the Right Device for BYOT

- Wireless internet capability.
- Headphone jack with child’s own headphones.
- Battery life - ideally the battery should last for 5-6 hours to be able to get through the school day without recharging.
- The device must have a protective cover or bag. A sleeve type protector is not recommended as the device can easily slip out.
- Android tablet - Version 4.0 above with front and rear facing cameras.
- iPad 2 or newer (including iPad mini)
- Browsers: Internet Explorer, Firefox, Google Chrome, or Apple Safari
- eReaders and tablet devices (Kindle, Nook, iPad, etc.) with Wi-Fi access
- Audio and video players such as iPods, including Wi-Fi
- Smartphones and other cellular devices
- No Laptops or VTech devices.
