OVERVIEW

Teachers will be working with students to design learning experiences that provide opportunities for students to be able to do the following:
- Explore essential knowledge in each content area
- Engage in solving authentic, real-world problems
- Expand future career and college readiness

5 C'S SKILLS HIGHLIGHTED:

- **Communication** - how can I share what I have learned with a greater audience?
- **Critical thinking** - what are problems in need of solving?
- **Collaboration** - how do I work with a team to design a project?
- **Creativity** - what solutions can I design to address the problem?
- **Citizenship** - how can I contribute to the world around me?

STUDENT LEARNING EXPERIENCE

These skills are complex, challenging, and focused on supporting students' future career and college readiness.

Students will be asked to engage in deeper learning through:
- Designing their own solutions to real-world problems
- Working independently and collaboratively to build skills
- Discussions, workshops, stations, projects, presentations, and more!

Please reach out directly to your child's teacher with any questions.
