

# AP Chemistry Summer Assignment:

Briar Woods High School, Ashburn VA

We are looking forward to teaching you during the 2019-2020 school year! You are expected to join the AP Chemistry Summer 2019 Google Classroom. The code is 44ek8r. A copy of the summer assignment packet is posted on Classroom. We will also post EdPuzzle videos during the summer to help you review the first-year chemistry material.

The first section of the summer assignment packet is a summary of the information you should have learned in first-year chemistry. After the summary notes, you'll find several worksheets. These are your homework assignments for the first unit of AP Chemistry. You are expected to have these completed by the third day of class (August 28<sup>th</sup> or 29<sup>th</sup>). Your first assessment will evaluate your understanding of the information from the summer assignment. It is important to come to class well prepared.

It is recommended that you do not wait until the last minute to start the assignment, do not procrastinate. Remember AP Chemistry is an equivalent course to an Introductory Chemistry college course. Taking a college level course in high school is difficult and it requires commitment, hard work and time.

If you are having difficulty with a specific unit there are many online resources available to you to assist you. You can also post to the forum on Classroom. Please feel free to contact us if you are having difficulty or have any questions.

Have a great summer and enjoy chemistry!
