### Reteach & Retest Policy

2019-2020

- a) If a student scores an 80% or above on a summative assessment, they are not eligible for a retake. They have shown they understand the content substantially and can move onto the next unit.
- b) If a student scores between a 70%-79% on a summative, they are eligible for a retake, but the highest they can score on the new summative is an 80%. Optional retakes must be initiated by the student and follow the teacher's re-teaching and retake guidelines. Only one retake per summative will be allowed.
- c) If a student scores below a 70%, it is the teacher's responsibility to schedule a re-teaching session and give the child a retake, and the new assessment will also have a cap of 80%. Only one retake per summative will be allowed.
