

Habitats

Quiz on _____

Be familiar with the following habitats and animals that live there.

Land Habitats

Desert

Forest

Tundra

Grassland

Savannah

Water Habitats

Ocean

Pond

River

Describe (don't just tell) the **4 basic components** of an animal habitat (food, water, shelter or cover, space)

A **habitat** is a place where an animal lives and grows.

An **environment** is made up of all the living and nonliving things in a place.

A **food chain** is the order in which animals eat plants and other animals.

Plants and animals depending on each other for survival is **interdependence**.

Recognize that different habitats meet the needs of different plants and animals. (For example, trees provide shade, a place to live and food. Animals spread seeds of plants.)

A **fossil** is what is left of a plant or an animal that lived long ago.

A **drought** is a long time without rain.

A **flood** is too much rain for a long time.
