

AP Seminar Agenda
August 21 (Wednesday)
Back to School Night Presentation

By the end of tonight's session, you will understand the following key information:

- A little about Mr. Sakole
- A description of the AP Seminar course
- Where to find ALL information, assignments, calendars, lectures, daily agendas, etc. for this course
- How to best support your student in this class

Objectives:

We will understand and be able to describe the key ideas and expectations of AP Seminar, as we also get to learn a little bit about Mr. Sakole. We will also be able to understand the best ways to support our student during the upcoming school year.

Closing Task:

I will describe my first impressions of Seminar and list AT LEAST one of my biggest fears about my student's upcoming year. I will also tell Mr. Sakole anything that I want him to know about my student. Finally, I will have a great evening!

Part I – Introduction (5 minutes) Whole Class

This is where I introduce myself to you and tell you about the Daily Agenda. I will also elaborate on the various aspects of this course.

Part II – Google Classroom (2 minutes) Whole Class

Watch as I give you a quick tour of Google Classroom. This site, which is accessible through LCPS GO, has a wide variety of tools that your students will use for the course. It also can help you to keep track of what is going on each day.

Part III – Question/Answer Period (Time Remaining)

You may feel free to ask any questions you have pertaining to the course. If you have any child specific questions, I would ask that you please reserve those for a later time (I would be happy to schedule conferences with anyone who has specific concerns).

Homework:

1. Encourage your student(s) to do their best and support them with positive comments on their achievement. Don't let the present day obstruct the bigger picture.
2. Add my name to your list of email addresses Thomas.Sakole@lcps.org. I am always happy to discuss your student's progress. Please, never hesitate to email if you have any concerns.
3. Take some time to look at the unit calendars, activities, and materials posted on Google Classroom after I meet your student over the next few days. This is a great way to be an active part of your student's academic progress.
4. Go home and get some rest... it has been a long day for all of us!!!! ☺
