Riverside Science Re-assessment Policy

Students will have the opportunity to re-assess on unit tests. Any student who earns less than a 93% will have the opportunity to re-assess one time within two weeks of the original test date. The re-assessment will be a new test based on the same skills in the first test. In the time between the test and re-assessment, students will need to work with the teacher for their specific remediation practices and review content prior to re-assessment. The student can earn up to a 93% on a re-assessment, and the highest score of the two will be the score recorded.
