Do you have all of the following information included in your PowerPoint?

1. Did you put the name of your drug and your name (s) using your full name (s) and correct capitalization?
2. What are the most common slang names for your drug?
3. How is your drug classified? It could be a stimulant, depressant, or hallucinogen. It may not tell you directly but look for what the drug does to your body. If it speeds you up, it is a stimulant. If it slows you down or makes you relaxed, it is a depressant. If it caused hallucinations or alters the way you see the world, it is a hallucinogen. Some drugs may have more than one classification.
4. What is the source of your drug? Is it man-made or does it come from a plant?
5. What type of addiction does your drug cause? This could be mental addiction or is it both mentally and physically addictive?
6. What is the legal or medical use of your drug…this might be “none”.
7. What are the dangers of using your drug?
8. What is an interesting fact about your drug?
9. What does your drug look like?
10. Cite your sources.

Databases & Library Resources: Subscription Databases can be found on the library webpage. These can be accessed at home using the passwords on page 4 of your agenda.

First: Build your background knowledge with Encyclopedia databases. World Book Advanced has entries with many language translations. Then, dig a little deeper by visiting other database sites, such as:

Health & Wellness provides medical, statistical, health, and related information. This is listed as a high school resource, see the librarian for your password.
