

# Content Creation Apps

Apps & Websites that can be used:

**iMovie** - This app allows users to create either a free-form movie or a “trailer” that follows a template using only pictures and text. Upload pictures and videos to create your masterpiece!

**Little Bird Tales** – This app works like a digital story book! Name your book, add your pages, and create your story. The app allows you to draw, upload, and customize illustrations then add text and/or voice recordings and watch your story come alive!

**Book Creator** – This app creates digital books! Customize your font, page design, and illustrations! The freeform pages allow for tons of creative options! (The free version allows for some features, but the paid version unlocks all features)

**Popplet** – This app works like a graphic organizer. Start with your main topic and click to add details, pictures, and information. Create a table, web, or any other connections you can think of!

**Prezi** – This website works like PowerPoint but premade templates make presentations more dynamic and exciting. Customize the “slides” and then watch the Prezi do the presentation work for you! Sign up and usage is free!
