

LCPS GO Password Recovery Set Up

You can now reset your password from home using go.lcps.org! However, you must set up this option in your GO profile **first**. (These instructions are for using GO on a computer. Steps on the mobile apps may vary.)

- 1) Open go.lcps.org and log in with your LCPS computer username and password.
- 2) In the upper right corner, select the drop-down arrow next to your profile picture. Then, click the “My Profile” button.

- 3) On the left side of the My Profile screen, select “Password Recovery Setup”. **Enter information for one or more of the password recovery options.** At minimum students must select and answer 3 security questions!

- 4) If you ever need to reset your password, use the “Help, I forgot my password” link on the LCPS GO sign-in screen.
