There are only four numbers (after 1) which are the sums of the cubes of their digits

\[
153 = 1^3 + 5^3 + 3^3 \\
370 = 3^3 + 7^3 + 0^3 \\
371 = 3^3 + 7^3 + 1^3 \\
407 = 4^3 + 0^3 + 7^3
\]
Congratulations on a great VML!
Next one will be **tomorrow**, November 8 2021!
We placed **first** in our county!
The contest and solutions are posted in the schoology
Volunteer Opportunities for service hours!

Math Lab
Now in the auditorium all blocks

Math Announcement Slides
Good math facts or puns in the morning announcements

Tutoring
It is possible to tutor family and friends
- Pre Calc block 1

Log them with paper or the google form in schoology!
Dues $$$

2 Options to pay:

1. Payment Portal
   On the Park View Website (only open until December!)

2. Cash or Check
   a. Give the money to Elijah and make sure he writes your name down during meeting dates
