

## **What is the difference between honors and dual enrollment courses?**

**Honors courses:** Grades earned in honors courses are “weighted” by adding .5 to the point value for the grade earned in a year-long course.

**Dual enrollment:** Grades earned in Dual Enrollment courses are “weighted” by adding 1.0 to the point value for the grade earned in a year-long course. Participation in Dual Enrollment (DE) allows students to meet requirements for high school graduation while simultaneously earning college credits. DE courses taught at the high school by an LCPS teacher enable students to earn college credits through agreements with a college or university while taking courses on their high school campus. The student earns six college credits upon completion of the year-long course.
