

Greetings!

You guessed it-- if you personally receive this letter, it means that I am so lucky to have you in my fifth grade homeroom!

I can't wait for our year together to begin; there's so much to learn, like how light travels (is it a particle or a wave?), how to operate with fractions, and how to find a story's message- a surefire method!

We will set goals --academic and personal-- and we can help each other reach them. We will work hard and then play goofy games for brain breaks. And we'll take moments to reflect and connect.

I will share a little about ME, but I am excited about getting to know you. Take a moment to visit the link below and fill out a quick fun survey...spelling doesn't count on this and there are no wrong answers!

Me In a Paragraph:

In case you didn't know, I am from NY and NJ originally, and that's where I began my teaching career. I have taught for 33 years, but since I love to learn, I am always seeking new cool opportunities. I love to exercise, camp, craft, bake, and do puzzles. My husband and kids like it most when I bake. My dog, cats, and chickens don't mind any of my hobbies, as long as they get my attention and care. I love veggies and my favorite color is green. My favorite subjects are reading and math, but I really enjoy them all!

Okay, now it's your turn. Please fill out that survey!

Hope to see you soon,
Ms. Kosman
