

SchoolLinks Guardian Perspective

As a Guardian, you have view-only access to the majority of pages in SchoolLinks. This document will walk you through how to navigate your student's casefile to find different college related information.

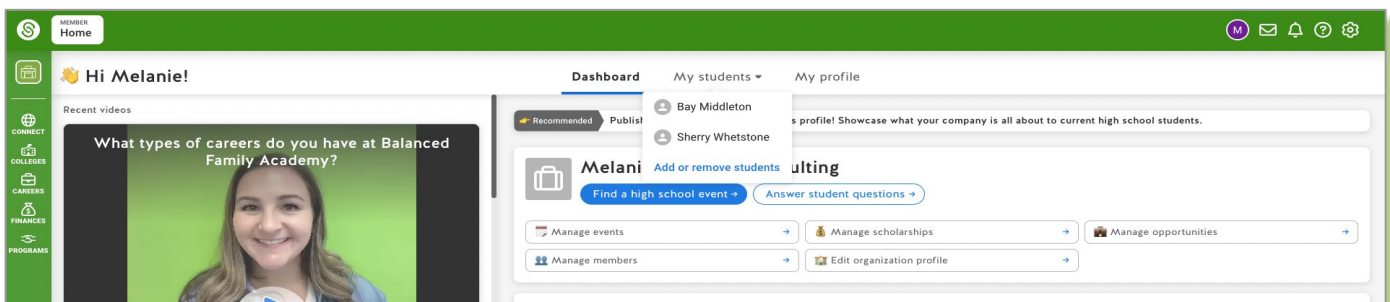

To learn more about the student process in the College Application Manager you can refer to [this document](#).

In order to access your SchoolLinks account, you will need to:

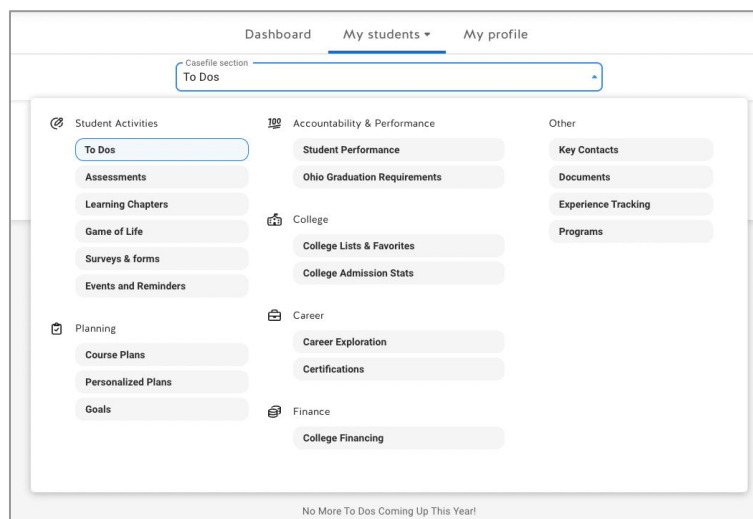

1. Visit your **ParentVue account**.
2. Once in ParentVue, select **Schoology & SchoolLinks** from the side navigation menu. Then, select **SchoolLinks Login for Parents/Guardians**.

If you have trouble accessing your ParentVue account, please reach out to your school.

Once logged in to your SchoolLinks account, you will select the **My Students dropdown** and select your 12th grade student from the list.

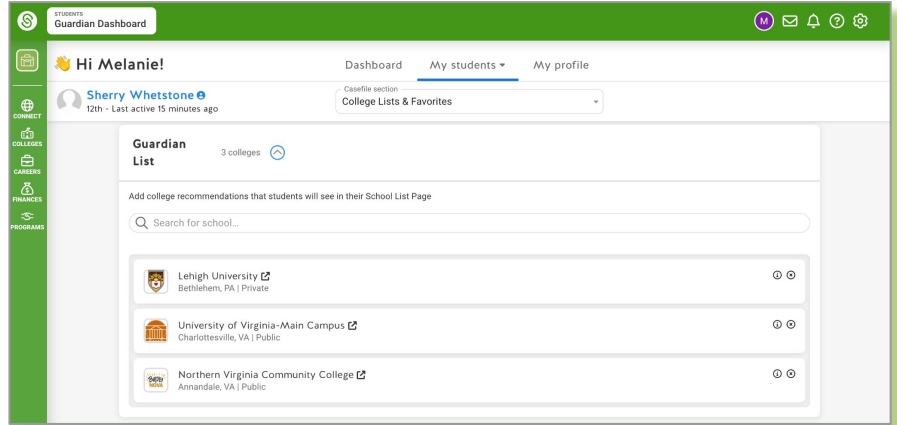

Within your 12th grade student casefile, navigate to **Casefile Sections**.

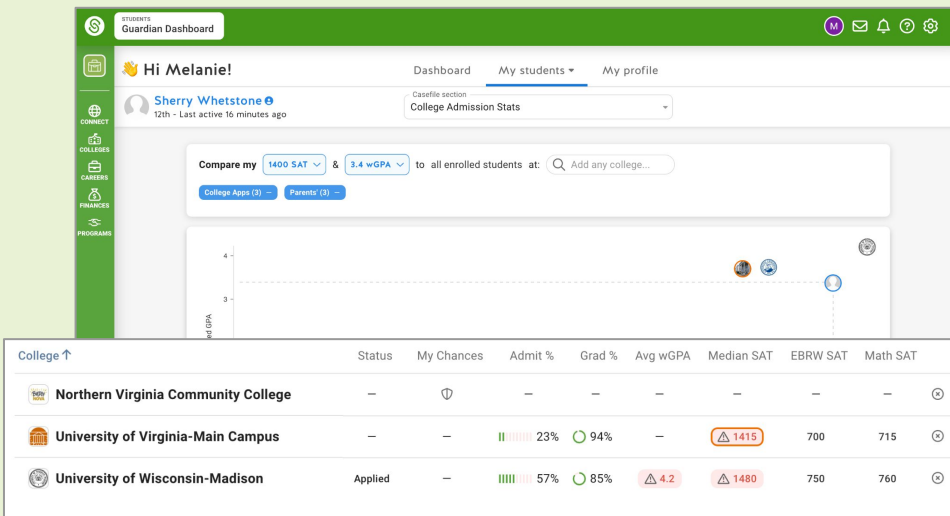

You can review the following casefile sections to review College related items under the **College section**:

College Lists & Favorites

In this section, you are able to review the colleges your students added to their favorites list and a suggested list from their counselor. Additionally, YOU can create a list of colleges you recommend for your student.

College Admission Stats

The Admission Stats page is another way to view where your student stands compared to other previously admitted students based on test scores and GPA. This tool can be used to compare scores for any schools your student has favored, and/or the list of schools you have recommended for your student.

College Financing

The College Financing Tool is a feature that allows students to input financial information about themselves to estimate college costs. You and your students can use their calculated financial aid to compare college costs.
