Connecting Personal Devices to the Wireless Network

If you have a personal device that you wish to have wireless access, create a trouble-ticket with this information. All information is mandatory – the request will be rejected by those-that-be if any is missing. Don’t know the MAC address (or what it is)? Search on Google – it’s normally not hard to find. I have to get instructions every time I do it, as well.

At some point, we will have a network technician come from the Central Office to do the actual coding. No, I can’t do it

- Teacher's name
- Teacher's dept and base room
- Type of device (MacBook, laptop, android, ipad, iphone, etc.)
- Mac Address for device.
- Who purchased the device (teacher's personal device or school / science department, etc.)
