

# Safari Montage

## Starting Safari Montage

Start  
Programs  
Productivity  
Safari Montage

Your login and password will be the same as your network login

## To link a video

Open a PowerPoint presentation

Back to Safari Montage

Click on a good title

Click on Permanent Links

Note from the top of the screen the URL (starts with 10.)

The numbers at the end are time stamps – that is, how far into the video it is.

Go to the bottom of the screen, highlight and COPY

Back to PowerPoint

Type a word, such as Video (using a picture will also work)

Highlight that word or picture

Right click

Choose hyperlink

In the Insert Hyperlink box, PASTE the url

OK

Now if you run your slide show, and click on the link, you will be transferred to the Safari Montage page, at that point in the film.
