Student Logins

**Network** – their first (default) password will be a six-digit number, created from their birthday, in the format mmddyy. So, if a student was born on June 7, 1998, their first password would be **060798**

**VISION** – the password will always be the same as their network password. NOTE: they are not able to log into VISION until they have logged into the network, and done the required initial password change.
