

Las comparaciones

When using **adjectives** to make comparisons about characteristics like: "He is as **tall** as she is."

Use this formula:

Subject → Thing 1 es tan (adjetivo) como Thing 2. ← "other"

**This formula is used to compare QUALITIES.

**The "constants" in the formula are tan, adjective, and como.

The parts that **MUST agree are Thing 1 with adjective and Thing 2 with verb.

First, choose a Thing 1 from the box on the left. Then, pick an adjective from the box on the right. Finally, create a sentence to show equality with a Thing 2. You may also use your own subjects or adjectives. Be creative!
