Authentic Problem

How do animals meet their life needs in the wild?

We were scientists that discovered new animals and our challenge is to teach others how these animals meet their life needs in the wild.

Connection to SOLs:

Science SOL 2.5

Art SOA Create-Prod-A

Connection to the World:

Students visited the Reston Zoo to talk with a zookeeper and observe how animals at the zoo met their life needs. They also observed animals in their natural habitat through their use of animal webcams set up around the world.

Public Product:

Student Scientists created 3D models of the animal they discovered in art class. They used their knowledge of animal habitats to build the appropriate terrarium for the newly discovered animal. These terrariums are on display for others to view.
