## FY21 School Board Questions

### January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
149	Mahedavi	Ellis/Jones	1/9/20

**Provide dollars to match slide 12 -Enrollment growth and changing demographics.**

Slide 12 of the Superintendent's Budget presentation showed historical growth of different population groups of students between FY09 to FY21 projected. Just as the slide showed duplicated counts of students who may fall into more than one category, the budget support is also duplicated. The following chart shows the three different student population groups and the change in the number of students and budget support from FY09 to the FY21 proposed budget. Budget support only includes positions and program costs directly attributable to supporting these students.

Growth between FY09 to FY21 Projected			
	Students	Budget	Some Examples
English Learners (EL)	117.1%	211%	English Learner Teachers, Parent Liaisons, School Social Workers
Students with Disabilities	86.0%	109%	Special Education Teachers, Special Education Program
Economically Disadvantaged (FRL)	139.1%	116%	Parent Liaisons, Social Workers, Differentiated Staffing

150	Serotkin	Ellis/Willoughby	1/11/20
-----	----------	------------------	---------

**Please provide the anticipated number of FY21 classrooms with 24, 25, 26, 27, 28, 29, 30, 31, and 32+ students at the elementary school level. Additionally, please provide the cost for lowering the threshold for a Teacher Assistant being required to each of those levels below the current thresholds, broken out by the grades 1-3 and grades 4-5 groupings. For example, the cost for a TA being required for all grade 1-3 classrooms with 24 and above students, the cost for a TA being required for all grade 4-5 classrooms with 29 and above students, etc.**

Currently, the FY21 proposed budget includes 23.0 Teacher Assistants to support the grades 1-5 classrooms (9.0 for grades 1-3 and 14.0 for grades 4-5). Because of the preciseness of using projected enrollment for individual classrooms to project staffing, it is important to note that there will be variations in budgeted classroom enrollment versus actual classroom enrollment. Further complicating this is the regional assignment of students at schools that no longer have space to accommodate them at their home school.

For grades 1-3, reducing the Teacher Assistant earned threshold from 29 students to 24 students, results in the incremental and cumulative addition of FTEs and costs as shown in the following table.

Loudoun County Public Schools  
FY21 School Board Questions  
January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
-------------	--------------	------------------	-----------------

150 (continued)

Teacher Assistant Grades 1-3				
Class Size	Incremental Additional FTEs Needed	Incremental Cost of Additional FTEs	Cumulative FTE Increase	Cumulative Total Cost
reduce to 28	15.0	\$725,850	15.0	\$725,850
reduce to 27	4.0	\$193,560	19.0	\$919,410
reduce to 26	12.0	\$580,680	31.0	\$1,500,090
reduce to 25	40.0	\$1,935,600	71.0	\$3,435,690
reduce to 24	55.0	\$2,661,450	126.0	\$6,097,140

For grades 4-5, reducing the Teacher Assistant earned threshold from 32 students to 29 students, results in the incremental and cumulative addition of FTEs and costs as shown in the following table.

Teacher Assistant Grades 4-5				
Class Size	Incremental Additional FTEs Needed	Incremental Cost of Additional FTEs	Cumulative FTE Increase	Cumulative Total Cost
reduce to 31	4.0	\$193,560	4.0	\$193,560
reduce to 30	0.0	\$0	4.0	\$193,560
reduce to 29	13.0	\$629,070	17.0	\$822,630

151	Serotkin	Willoughby	1/11/20
-----	----------	------------	---------

**What would the cost be to "plus up" all teachers' steps to their correct years of experience, for those teachers affected by a past step increase freeze?**

It would be a considerable undertaking to review employee files regarding step placement. In FY15, teachers did not receive a step increase, but they did receive a pay increase due to an increase applied to the teacher salary scale that year. In FY10, teachers did not receive any type of pay increase. Over the years, teachers have benefitted from step increases, market scale adjustments, and salary scale restructuring improvements.

Loudoun County Public Schools

January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
152	Mahedavi	Ziegler	1/12/20

**What is our teacher evaluation process or a banding process to identify high performing, performing or under- performing Licenses Teachers?**

The Licensed Evaluation Handbook (<http://bit.ly/LCPSLicensedEval>) outlines the teacher evaluation process. The School Board approved the current edition of the Handbook in June 2019.

Administrative staff evaluates all licensed employees annually. Other Administrators (assistant principals, director of school counseling, and athletic director) assist principals in holding goal-setting conferences, conducting observations, and writing evaluative statements.

The evaluation system uses the following range to determine the summative performance rating:

- 4 – Accomplished (3.6 – 4.0)
- 3 – Proficient (3.0 – 3.5)
- 2 – Developing/Needs Improvement (2.0 – 2.9)
- 1 – Unsatisfactory (1.0 – 1.9)

A Plan of Improvement (POI) is a process specifically designed to guide administrators on how to correct a performance deficiency or inappropriate employee conduct. A POI is used when the licensed employee has received two or more ratings of developing needs/improvement or unsatisfactory on their summative evaluation. A POI is a school-based plan that can be written at any time. If a POI for a licensed employee is necessary, a conference with the employee occurs to present the POI Plan as a positive step to enhance the professional growth of the employee. During the meeting, documented concerns are addressed and action steps for improvement are outlined. The employee is provided with resources and training opportunities as support. The administration established specific timelines with measurable and achievable dates to monitor employee performance.

If a continuing contract teacher receives an overall rating of Unsatisfactory for a summative evaluation, a formal Plan of Assistance (POA) through the Department of Human Resources and Talent Development (HRTD) must be implemented at the beginning of the following school year. The Plan of Assistance (POA) is designed to provide intense support for a teacher in the spirit of mutual trust and assistance for the employee. Principals develop the POA to include the teacher's strengths, areas of concern, and resources for assistance. Areas of concern are aligned with the evaluation standards. Central office and school-based personnel may serve as resources during the nine-week plan implementation. An instructional coach from the Department of Human Resources and Talent Development is assigned as a layer of support for the employee. HRTD's Instructional Coaches provide targeted support with lesson planning, instructional delivery, modeling, and co-teaching. Like the POI, the POA Plan specifies specific timelines, action steps for improvement, and dates to monitor employee performance.

----------------	-----------------	---------------------	--------------------

**152 (continued)**

Continuing and Non-Continuing Contract (probationary) Licensed Employees may be informed of the possibility of receiving a less than proficient evaluation. A Non-Continuing Contract Licensed Employee (probationary) who receives an unsatisfactory evaluation will be recommended for non-renewal. As noted in Virginia Code 22.1-307 (B), a teacher who has attained continuing contract status may be recommended for dismissal for incompetence, which the code defines as one or more unsatisfactory performance evaluations. If employment continues, an employee who receives an unsatisfactory evaluation shall not receive a step increase in pay the following school year (School Board Policy 7652). To support teachers who are at risk of termination, the administration schedules a conference with the employee provides the employee documentation of a Mid-Year Support Plan. The Mid-Year Support is a formalized plan that outlines areas of concern aligned with the evaluation standards, strategies for improvement, and resources of assistance. Central office and school-based personnel are identified as resources. An instructional coach from the Department of Human Resources and Talent Development is assigned as a layer of support for the employee. Instructional coaches provide non-judgmental and confidential support aligned with the evaluation standards.

------------	--------------	--------------------	----------------

**Number of Instructional Facilitators county wide, leadership and cost of the program (Basically an overview of their purpose, the impact, and the number in each area and who they report to).**

Instructional Facilitators provide instructional coaching and support to teachers and school leaders. LCPS has several types of Instructional Facilitators in the Departments of Instruction and Pupil Services. The 2016-2017 school year was the first year of the Division Instructional Facilitator Program in DOI. During its second year, the Research Office conducted a program evaluation to gather data on the impact of the program. The link to Division, Instructional Facilitator Program Evaluation is at <https://www.lcps.org/page/1997>. Since then, the program has grown and there is now a staffing standard for Division Instructional Facilitators who are each assigned to certain schools to provide coaching and support in a variety of instructional initiatives. This team also works with other instructional facilitators who provide targeted coaching and support for certain groups of teachers (e.g. Specialized Instructional Facilitators who work with Special Education teachers) or certain subject areas (e.g. Instructional Facilitators for Mathematics). The following chart provides the details of the positions:

Position Title	Position Description/Impact	Contact	Cost
Instructional Facilitator, Division (DIFs and SBIFs)	<p>The Instructional Facilitator Program in Loudoun County Public Schools supports teachers and teams in all elementary, middle, and high schools to enhance teacher practice and student learning.</p> <p>Instructional Facilitators support Professional Learning Communities so:</p> <ul style="list-style-type: none"> <li>• students are engaged in high quality learning experiences;</li> <li>• trust and relationships are built and maintained;</li> <li>• teams are high functioning;</li> <li>• data driven decisions are used to inform instruction; and best practices are implemented.</li> </ul>	Instructional Facilitator Supervisor	<p><b>Current</b> - \$3,135,142</p> <p><b>Proposed</b> with Deeper Learning DIFs and one new HS DIF due to staffing standard - \$3,587,830</p>
Instructional Facilitator, Mathematics (IFM)	<p>Under the supervision of the Supervisor of Mathematics, the Mathematics Instructional Facilitator assists teachers and administrators in developing instructional knowledge in the area of mathematics. The Mathematics Instructional Facilitator will work side-by-side with classroom teachers, special education teachers, and other staff training, planning, modeling, and evaluating the delivery of mathematics instruction. Data collection and analysis will be modeled with an emphasis on developing programs that are consistent with evidence-based practices and implemented with fidelity for successful student outcomes.</p>	Mathematics Supervisor	<p><b>Current</b> - 3 FTEs</p> <p><b>Proposed</b> - 2 additional FTEs</p> <p><b>Cost</b> - \$577,301</p>
Instructional Facilitator, Computer Science (IFCS)	<p>Under general supervision of the Mathematics Supervisor, the Computer Science Instructional Facilitator assists teachers and administrators in developing increased content knowledge and pedagogical strategies through ongoing and sustained professional learning experiences. Additionally, the Facilitator provides ongoing support in the areas of curriculum, instruction, and assessment of computer science integration to build capacity among elementary and middle school content teachers. This position will also be responsible for designing and delivering quality professional development on the utilization of effective instructional strategies in computer science and bringing evidence-based practices into classrooms by working with teachers and other school leaders. This position will be responsible for supporting schools in the integration of the Computer Science Standards according to the VDOE's timeline in addition to implementing county wide initiatives, including, but not limited to, Project Based Learning, Performance Based Assessments, and Personalized Learning.</p>	Mathematics Supervisor (new Computer Science Supervisor will become supervisor of the IFCS when hired)	<p><b>Current</b> - 3 FTEs</p> <p><b>Proposed</b> - 2 FTEs (1 Grant Funded)</p> <p><b>Cost</b> - \$477,532(Local) \$113,172(Grant)</p>

<b>Position Title</b>	<b>Position Description/Impact</b>	<b>Contact</b>	<b>Cost</b>
Instructional Facilitator, Equity and Culturally Responsive Instruction	<p>Primary responsibilities will include:</p> <ul style="list-style-type: none"> <li>• Supports culturally responsive professional learning opportunities for school and division staff, including efforts relating to opportunity gaps, achievement gaps, systemic racism, implicit bias, and participation by students from underrepresented groups in deeper learning experiences.</li> <li>• Collaboratively support efforts to provide professional learning pertaining to racial consciousness culturally responsive instruction in support of deeper learning.</li> <li>• Assists in equipping teachers and CLTs with the appropriate tools, resources, and professional learning, that enables them to provide culturally responsive teaching and relevant pedagogy in a classroom setting in support of deeper learning.</li> </ul>	Supervisor, Equity and Culturally Responsive Instruction (budget pending)	<p><b>Proposed - 3 FTEs</b></p> <p><b>Cost - \$339,516</b></p>
Instructional Facilitator, English Learner	The English learner facilitators will assist teachers and administrators in developing increased content knowledge and pedagogical strategies related to English language and literacy development through ongoing and sustained professional learning experiences. This position will be responsible for designing and delivering quality professional development on the utilization of effective instructional strategies to support English language and literacy development and bringing evidence-based practices into classrooms by working with teachers and other school leaders. The EL Facilitator's goal is to increase the ability of educators of ELs to understand and implement language and literacy programs and interventions as well as the EL curricula and language standards, which focus on embedded opportunities for language and literacy instruction to support the language acquisition of ELs.	English Learner Supervisor	<p><b>Proposed - 2 FTEs</b></p> <p><b>Cost - \$226,344</b></p>
Instructional Facilitator, English and Reading	English and Reading Instructional Facilitators assists teachers and administrators in developing increased content knowledge and pedagogical strategies through ongoing and sustained professional learning experiences. Facilitators provide ongoing support in the areas of curriculum, instruction, and assessment. This position will also be responsible for designing and delivering quality professional development on the utilization of effective instructional strategies in English language arts and bringing evidence-based practices into classrooms by working with teachers and other school leaders. This position will be responsible for supporting schools in integrating county-wide initiatives, including but not limited to Project Based Learning, Performance Based Assessments, and Personalized Learning.	Elementary Reading and Writing Supervisor (Elementary) and Secondary English and Reading Supervisor	<p>Reallocated positions</p> <p><b>Proposed reallocation - 6 FTEs</b></p> <p><b>Cost - \$679,032</b></p>

**153 (continued)**

The Department of Pupil Services has a team of Instructional Facilitators that are “Specialized” because they are highly skilled at providing side-by-side support to general education and special education teachers in the delivery of specialized approaches for students with disabilities. Specialized Instructional Facilitators (SIFs) provide targeted support to teachers and school teams based upon unique student needs, progress monitoring, and school accreditation data for students with disabilities. As listed below, the SIFs also provide professional learning and technical support that is unique to the area of focus.

The SIF team and specific special education supervisors’ partner with the Department of Instruction facilitators and school-based teams to ensure alignment of curriculum goals and progress monitoring support. We believe the SIFs are highly impactful as evidenced by MAP progress monitoring, IEP goal progress, and school/teacher feedback. The following chart provides the details of the positions.

<b>Position Title</b>	<b>Position Description</b>	<b>Supervisor</b>	<b>Number of Facilitators</b>
Specialized Instructional Facilitator-  Assistive Technology (SIF-AT)	<p>Responsible for working directly with special education staff on the effective use and integration of technology to support student needs. Assists with implementation of strategies and tools to provide access to students to instructional and educational materials. Provides collaboration and evaluation services for school staff and students. Delivers division-wide training to provide professional learning for school staff in order to build capacity. Plans and conducts collaborative model lessons that demonstrate the use of assistive technology.</p> <p>Each SIF-AT is assigned to support a cluster of schools.</p>	Special Education Supervisor - Related Services	<p>There are 9 SIF-ATs for the division.</p> <p>Cost: \$1,098,043</p>
Specialized Instructional Facilitator-  Autism (SIF-AUT)	<p>Responsible for providing leadership, training and support for the implementation of specialized approaches in autism services instruction. This position works side-by-side with classroom teachers, special education teachers and other staff for training, modeling, observing, monitoring and evaluating the delivery of specialized approaches. Primary responsibilities include teach, model, facilitate and build teacher capacity in several schools to provide specialized instructional and behavior strategies using evidence-based approaches. Assist teachers in collecting and analyzing data; conduct fidelity checks to provide feedback for providers and to assist in data collection; and facilitate the process to identify appropriate strategies between identified needs and specific instructional and behavioral strategies. Collaborate with school-based and central office staff to provide professional development, engage in ongoing work in furthering the tiered approach for specialized instruction for students with autism and assist in developing action plans to support students across settings who require specialized instruction.</p> <p>SIF-AUTs are assigned by high school clusters and support schools with specialized programs for autism.</p>	Special Education Supervisor - Autism	<p>There are 4 SIF-AUTs assigned to the division.</p> <p>Cost: \$425,645</p>

Position Title	Position Description	Supervisor	Number of Facilitators
Specialized Instructional Facilitator - Behavior (SIF-B)	<p>SIF-B's assist staff with the development of individualized programming centered around evidence-based practices to meet the unique behavioral needs of students. SIF Bs will facilitate the special education and general education processes across the school division both preventatively and during current interventions. This is done through coaching, observations, providing feedback, analyzing data and assist with Functional Behavior Assessments (FBAs) and Behavior Intervention Plans (BIPS). The aim is to provide the necessary support in the area of evidence-based behavior interventions and appropriately fade support to build capacity among school staff. SIF-Bs support identified staff within the scope of MTSS and specially designed instruction to meet the needs of the whole child.</p> <p>SIF-Bs are assigned to the six regions of LCPS and also provide intervention support to individual teachers as appropriate.</p>	Special Education Supervisor	<p>There are 6 SIF-Bs for the division.</p> <p>Cost: \$669,289</p>
Specialized Instructional Facilitator-Math (SIF-M)	<p>SIF-Ms assist teachers and administrators in developing specialized knowledge in the area of mathematics. Ongoing and sustained professional learning experiences will provide support for the implementation of specialized approaches in mathematics instruction to build capacity among instructional staff. Data collection and analysis will be modeled with an emphasis on developing programs and services that are consistent with evidence-based practices and implemented with fidelity for successful student outcomes. The specialized instructional facilitator-mathematics will work side-by-side with classroom teachers, special education teachers and other staff for training, modeling, observing, monitoring and evaluating the delivery of specialized approaches.</p> <p>SIF-Ms are assigned to schools based upon school data related to SWD academic progress.</p>	Special Education Supervisor - Specialized Instruction	<p>There are currently 5 SIF-Ms.</p> <p>Cost: \$558,930</p>

Position Title	Position Description	Supervisor	Number of Facilitators
Specialized Instructional Facilitator-Reading (SIF-R)	<p>SIF-Rs assist teachers and administrators in developing specialized knowledge in the area of reading. Ongoing and sustained professional learning experiences will provide support for the implementation of specialized approaches in reading/literacy instruction to build capacity among instructional staff. Data collection and analysis will be modeled with an emphasis on developing programs and services that are consistent with evidence-based practices and implemented with fidelity for successful student outcomes. The Specialized Instructional Facilitator - Reading will work side-by-side with classroom teachers, special education teachers and other staff for training, modeling, observing, monitoring and evaluating the delivery of specialized approaches.</p> <p>SIF-Rs are assigned to schools based upon school data related to SWD academic progress.</p>	Special Education Supervisor - Specialized Instruction	<p>There are currently 10 SIF-Rs.</p> <p>Cost: \$1,221,278</p>

Loudoun County Public Schools  
FY21 School Board Questions  
January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
154	Corbo	Williams	1/13/20

**What is the expected outcome and measurement of outcomes for each LCPS Strategic Action?**

Each of the strategic actions include annual desired outcomes and performance measures. This response includes each of the strategic actions approved as part of Vision 20/20, as well as the two strategic actions approved as part of the next iteration of our strategic plan. In addition to being included in this response the Vision 20/20 strategic actions are posted on the Vision 20/20 web page accessed via the School Board web page pull-down tabs.

The expected outcomes are included as a supplemental item in BoardDocs and are labeled Question 154 Supplement Strategic Plan Outcomes.

155	Corbo	Lewis	1/13/20
-----	-------	-------	---------

**What is the cost for restoring the summer pay rate for transportation?**

The cost to restore bus drivers and bus attendants from the band rate used for Summer 2019 of \$20 for bus drivers and \$14.75 for bus attendants to their actual rate of pay would be \$308,586. LCPS has established a practice of utilization of standardized hourly rates for certain positions including summer assignments outside of the annual contract. Examples of other positions that pay part-time summer positions using the band rates are Principals, Teachers, Teacher Assistants and Secretaries for summer school. Standardized rates proposed for FY21 can be found on page 323 in the budget book. In an effort to maintain consistent practices, an alternative solution to restoring actual salaries for drivers and attendants is to reassign the current band rate to better reflect adequate compensation for the temporary summer assignment. Based upon the average hourly driver rate of \$24.04, summer drivers could be moved from Band 7 at \$20.00 to Band 9 at \$25.75. Similarly, the average hourly rate of attendants is \$18.04 who could be moved from Band 5 at \$17.00 to Band 6 at \$18.00. The cost of adjusting the bands for both drivers and attendants would be \$136,664.

156	Corbo	Scheivert	1/13/20
-----	-------	-----------	---------

**What is the cost to reinstate printers in each classroom? What is the justification for their removal?**

In 2015, the district conducted a print study to address concerns that the school division was spending a considerable amount of school funds on toner/printing supplies and a large amount of time repairing classroom printers. A print strategy was introduced that shifted away from individual classroom printers to zone-based printing. In zone-based printing, robust printer/copiers are placed throughout the school making it easy for staff to access while reducing the overall printing costs. This model strikes a balance between ease of access and cost-effectiveness. Each site is custom crafted with building administrators and staff assisting to determine the best placement of the new printing zones. The Multi-Function Devices (MFD's) allow for printing, copying, scanning, and faxing.

Loudoun County Public Schools  
FY21 School Board Questions  
January 30, 2020

<b>Item Number</b>	<b>Board Member</b>	<b>Staff Assignment</b>	<b>Date of Request</b>
------------------------	-------------------------	-----------------------------	----------------------------

**156 (continued)**

Since 2015, the school division has been focused on reducing the need to print documents and make digital resources the priority. District initiatives such as the virtual first-day packet, online report cards, Blackboard Connect, PVUE/SVUE, eHallpass, and the implementation of 1:1 devices have significantly reduced the need for paper printing and increased overall access to digital tools, processes, and instructional resources. However, under the current MFD deployment, students and staff are always within the proximity of a printer. Following are the hardware costs only associated with a classroom-based printer.

Number of Classrooms	Cost per printer	Total
5016	\$350.00	\$1,755,600

Over the past few years, DDI has significantly reduced our dependence upon professional services for large summer implementations, such as the instructional computer modernization and collaboration monitor modernization projects. However, we still maintain a larger project workload than our resources can complete within the short summer timeline. The professional services costs below would be necessary to complete this large scale effort which will require significant logistics and human resources for warehousing, delivery, installation, and site cleanup.

Number of Classrooms	Cost per classroom	Total
5016	\$100.00	\$501,600

The district does not currently maintain the parts and equipment necessary to ensure classroom printers remain functional and do not become a frustration within the digital learning environment. Two additional costs are necessary to ensure that these devices are maintained properly. First, we would anticipate an annual 2% to 5% device failure rate, so the DDI repair and maintenance budget will need an increase to cover these expenses.

Total Device Costs	Anticipated Failure Rate	Maintenance Increase
\$1,755,600	5%	\$87,780

Second, additional staffing would be necessary to ensure the implementation of several thousand new devices does not diminish DDIs ability to meet district expectations for proactive maintenance, on-demand technical support, and end-user satisfaction. DDI would recommend a small increase to the current Digital Experience Staffing standards, as shown on the chart on the following page.

Loudoun County Public Schools  
FY21 School Board Questions  
January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
-------------	--------------	------------------	-----------------

156 (continued)

Current Staffing Standard	Revised Staffing Standard	FTE	Staffing Increase
1 per 700 students	1 per 640	11	\$787,754

In addition to the costs above, it would be necessary to increase the instructional allotment rate to provide funding for schools to purchasing toner, as shown in the table below. These averages are calculated using actual 2015 expenditures for toner.

Level	Average Annual Toner Cost per school (based on FY15 actual costs)	Number of Schools	Total Average Toner Cost	Increase to Per Pupil Instructional Allotment Rate
Elementary School	\$5,109	57	\$291,213	\$7.75
Middle School	\$5,727	17	\$97,359	\$4.71
High School	\$11,177	19	\$212,363	\$7.80
Douglass	\$11,177	1	\$11,177	
The Academies	\$11,177	1	\$11,177	
<b>Total</b>	<b>\$44,367</b>	<b>95</b>	<b>\$623,289</b>	

The total cost to reinstate printers in each classroom is \$3,756,023 and is summarized in the following table.

Summary of Costs		
	FTE	Cost
Printer		1,755,600
Installation		501,600
Maintenance		87,780
Toner		623,289
Digital Experience Specialists	11.00	787,754
	11.00	3,756,023

Loudoun County Public Schools

January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
157	Corbo	Jones/Ellis	1/13/20

**Provide information comparing the number of special education students, staff and support staff (assistants etc.) to EL students, staff, support staff and assistants.**

Staffing and services provided to LCPS students receiving special education services and English learner services are guided by federal and state laws and guidance. Federal and state laws and regulations provide mandates and guidelines for the provision of special education services for children with disabilities. It is the policy of LCPS to adhere to all federal and state laws and to ensure Free Appropriate Public Education (FAPE) to students with disabilities through specialized instruction to access the general education curriculum, in the least restrictive environment, to the extent possible based upon the student's individualized needs. The LCPS staffing standards related to special education ensure compliance with the Virginia Standards of Quality and regulations governing special education programs.

Students with disabilities receive support based upon what is described in their Individualized Education Program. In addition to specialized supports, students with disabilities are instructed with students without disabilities in general education settings and classrooms, as appropriate, and in accordance with the Individualized Education Program. The amount of special education services varies among students with disabilities and is described as Level I or Level II depending upon the amount of time the student receives special education. An LCPS strategic action continues to focus on inclusive learning environments for all students. To support this goal, LCPS provides a continuum of services, social emotional support, specialized instruction, and behavioral support for students with disabilities. The FY21 budget requests and staffing standard enhancements are proposed to provide services to the projected 10,600 students with disabilities.

The LCPS English Learner (EL) Program is a comprehensive program that serves students in all of LCPS' elementary, middle, and high schools, as well as the charter schools and educational centers.

LCPS' EL Program is a Title III Program, the purpose of which is to:

- help ensure that English Learners attain both English language proficiency and meet state academic standards,
- provide an effective language instruction educational program (LIEP),
- provide professional development to teachers, principals and LEAS to develop/enhance capacity to provide an effective LIEP,
- promote parent, family, and community participation in LIEPs.

**Title III** is a part of the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act of 2015 (ESSA). LCPS is preparing for the triennial audit in February 2020.

In addition to the Title III Civil Rights Requirements, LCPS' EL Program also must meet Federal Requirements for Serving English Learners. These include:

## FY21 School Board Questions

### January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
-------------	--------------	------------------	-----------------

#### 157 (continued)

- the identification, screening, and placement process is consistent for all incoming students,
- division personnel are implementing the English Language Development (ELD) standards in classrooms,
- ELs are provided meaningful access to the same curriculum as all students,
- ELs are provided a language instruction educational program (LIEP) so that they may attain English proficiency,
- ELs are placed in specialized programs and extracurricular activities that are available to all students,
- the appropriate language instruction educational programs and services are available for ELs who are identified with disabilities.

The following chart compares the number of special education students, teachers, and teacher assistants to English learner students, teachers and teacher assistants as requested.

LCPS FY21 (Proposed)	English Learners	Students with Disabilities
<b>Students</b>	11,528	10,600
<b>Teachers</b>	370.3 FTEs	1,048.4 FTEs <sup>1</sup>
<b>Teacher Assistants</b>	0 FTEs	1,049.0 FTEs <sup>2</sup>

<sup>1</sup>Excludes 15 Consulting Teachers

<sup>2</sup>Excludes 13 Advanced Interpreter for Deaf and Hard of Hearing

Following is a chart comparing English Learner and Special Education students and staff from neighboring school divisions.

	FY20 Program Comparison to select WABE Divisions					
	English Learner			Special Education		
Division	Approved Enrollment	Teacher	Teacher Assistant	Approved Enrollment	Teacher <sup>1,2</sup>	Teacher Assistant <sup>1,2</sup>
<b>Loudoun</b>	10,568	371.3	-	10,382	1,144.1	983.0

FY21 School Board Questions  
January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
158	Corbo	Ellis	1/13/20

**Provide a chart to show test scores over the past 5 years SOL, MAP, PALS and DRA. The public says we have dropped in test scores over the past two years. Is this true and if so please identify where our weaknesses are as a county and school.**

Each year, the Department of Instruction provides a presentation to the School Board on the previous year's student achievement data. The data in this annual presentation includes Standards of Learning (SOL), Scholastic Aptitude Test (SAT), Advanced Placement, and Measures of Academic Progress (MAP) data for LCPS students in addition to comparison data of neighboring school divisions. Following is a link to the Board Docs Information Item that contains the October 2019 School Board presentation on student achievement and other relevant attachments. This presentation includes SOL and MAP assessment results.

<https://bit.ly/37znjZ4>

In LCPS, there have been slight decreases in Science and Reading SOL proficiency between 2015-16 and 2018-19, while Social Science and Math SOL proficiency rates have been consistent. These patterns are also reflected throughout other divisions across Virginia. LCPS achieved greater than projected growth in Math and Reading according to MAP Fall-Spring growth scores for 2018-19, which was the first year MAP data was available for all elementary and middle schools. The Developmental Reading Assessment 2 (DRA) and Phonological Awareness Literacy Screening (PALS) data indicate slight decreases in student readiness in the Spring for 2014-15 through 2018-19.

The PALS assessment is given to students in Grades K-2. Staff does not report this data as part of the annual student achievement presentation because of the nature of the tool. Rather than measuring student achievement, the PALS assessment is a screening, diagnostic and progress monitoring tool for grades K-2, and it is used to assist teachers in identifying students in these grades in need of reading intervention.

Additional information on the PALS assessment and early reading intervention can be found on the VDOE's website here:

<https://bit.ly/2RIcnTH>

The DRA is a formative reading assessment system that allows teachers to assess student reading level and observe, record, and evaluate changes in performance. Similar to the PALS assessment, staff does not report this data as part of the annual student achievement presentation because of the nature of the tool.

The DRA2 Benchmark Assessment is a standardized reading test used to determine a student's instructional level in reading. The DRA2 is administered individually to students by teachers. During the DRA2 administration, students read a selection (or selections) and then retell what they have read to the examiner.

Please provide staffing standards and cost projections for the following, if we count students receiving free or reduced lunch as 1.5:

- a. parent liaisons
- b. counselors
- c. teachers in grades K-12
- d. other school-based personnel (and delineate the positions)

The following chart displays the additional FTEs or hours (for Parent Liaisons) that would be required if students from economically disadvantaged families were weighted as a 1.5 student in the staffing standard calculations. The FY21 proposed budget includes 24.0 Differentiated FTEs that schools can utilize in support of these students. Also, several staffing standards for the positions listed below have enhancements for FY21 to provide additional support to schools.

Position	Economically Disadvantaged	
	FTE	Amount
Assistant Principal, MS	1.0	\$ 147,290
Secretary I, MS	1.0	\$ 50,572
Teacher Assistant, Study Hall - MS	1.0	\$ 48,390
Teacher, Grades 6-8	102.7	\$ 10,737,901

## FY21 School Board Questions

### January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
163	Mahedavi	Willoughby	1/14/20

#### How much overtime do we pay for classified positions in a year?

The following table shows two years of actual classified overtime expense, the current year budget for classified overtime, and the FY21 proposed budget for classified overtime. Some common examples of overtime usage include Custodians and Bus Drivers supporting after-hours programs. The FY21 proposed budget has increased to be more in line with FY19 actual.

FY18 Actual	FY19 Actual	FY20 Budget	FY21 Proposed
5,336,900	6,382,416	5,921,202	6,309,202

164	Morse	Ziegler	1/16/20
-----	-------	---------	---------

#### Professional lanes on the salary scale go to step 24. Why do the Administrative lanes and most of the auxiliary lanes only go to step 20?

The administrative lanes assume that an employee will have professional experience before placement on the administrative scale. For example, a teacher promoted to Assistant Principal must have a minimum of three years' experience as a classroom teacher. Additionally, an employee promoted to Supervisor, Facilities Services, must have a minimum of 10 years' experience in a skilled trade or building maintenance. The scale design accounts for these experience levels.

The professional lanes are designed to bridge the gap between the classified and the administrative scale. The classified scale has 28 steps, and the administrative scale has 20. A hypothetical career path in non-teaching positions could take an employee from the classified scale to the professional scale to the administrative scale as they gain experience and longevity. For example, the career path of a candidate hired as an Endpoint Specialist (Classified Scale) in DDI could aspire to an Endpoint Engineer (Professional Scale) and culminate in the position of Supervisor, Endpoint Management (Administrative Scale).

The Auxiliary Scale was designed based on market and recruiting data that showed the need to increase salaries earlier in an employee's career. Expanding the scale beyond twenty would create a situation where employees earned wages that far exceed market rates beyond step 20.

**Please provide a list of gifted staff, how many classes/students they service broken down by location.**

The following tables show a list of gifted education FTE and the number of students they serve in each school for elementary and middle school. At the high school level, LCPS has one Gifted Education Resource Teacher who is based in the central office. This individual coordinates high school gifted education tasks including, but not limited to, Summer Regional Governor's School and Thomas Jefferson High School for Science and Technology entrance exams for LCPS. This staff person also provides support to middle school gifted resource teachers.

Loudoun County Public Schools  
FY21 School Board Questions  
January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
166	Serotkin	Willoughby	1/17/20

**What would the cost be to provide full time employees with 8 weeks of Paid Family Leave, in a similar manner as DCPS?**

Currently, LCPS does not provide a separate paid family leave benefit. LCPS, in accordance with the Family Medical Leave Act (FMLA), does provide unpaid leave for maternity, paternity, adoptions, foster care, medical leave for a family member and medical leave for oneself. Also, LCPS offers short-term disability benefits for certain situations. Due to uncertainty of how the short-term disability program would be administered with the introduction of a new paid leave benefit, it is recommended that this be reviewed outside of the budget process.

167	Corbo	Ellis	1/17/20
-----	-------	-------	---------

**Please provide teacher feedback from programs - surveys, etc. What process is used and what data is collected to evaluate a program at the end of the school year? For example: Lucy Calkins We started the program \_\_\_date\_\_\_, at \_\_\_ list schools\_\_\_, feedback from teachers and test scores after year one, two, three etc. If we are not using this format what format are we using to track and record the impact of our programs: One to One Technology, PBL, One to the World, PL, Go Math, etc.**

The Research Office provides data analysis and reports, program planning and evaluation, survey design and analysis, and technical assistance for school improvement to better inform decisions, advance teaching, and improve learning in Loudoun County Public Schools. The office collects, analyzes, and reports student data in multiple formats upon request by the Loudoun County School Board, school and central office staff, and other stakeholders (including FOIA requests).

The Research Offices conducts formative and summative evaluations of new and established instructional programs administered within LCPS. The methods for reviewing these programs vary depending on the research questions, program design, and reporting requirements. To inform program staff and other key stakeholders of program effectiveness, we complete evaluation briefs and annual reports. Due to the size of the Research Office (1 Supervisor, 1 Research Assistant, 1 Data Analyst, 1 Program Analyst), staff prioritizes program evaluations to be done each year. Sample evaluation briefs and reports from the past several years can be found at <https://www.lcps.org/page/1997>.

FY21 School Board Questions  
January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
168	Corbo	Ellis	1/17/20

**Please provide a list of students who are not reading on grade level broken down per school over the past 5 years.**

Below is a table of all LCPS schools and the Reading SOL pass rates for the past five years. In LCPS, there have been slight decreases in Reading SOL proficiency between 2015-16 and 2018-19. These patterns are also reflected throughout other divisions across Virginia. LCPS uses more than the Reading SOL to determine readiness and reading level, including the Measures of Academic Progress (MAP), PALS and DRA data. LCPS achieved greater than projected growth in Math and Reading according to MAP Fall-Spring growth scores for 2018-19, which was the first year MAP data was available for all elementary and middle schools. The DRA and PALS data indicate slight decreases in student readiness in the Spring for 2014-15 through 2018-19. This data was provided in response to question 158.

Loudoun County Public Schools  
FY21 School Board Questions  
January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
169	Corbo	Ellis	1/13/20

**If we continue the gifted model, have we need to provide classroom space for FUTURA students. Is it possible to require a space in each school for the FUTURA program?**

As we continue the transition to the school-based, collaborative gifted model, the number of FUTURA centers will decrease. Once there is a complete transition, there will not be a need for FUTURA center classrooms. Gifted resource teachers will provide “push-in” support to general education classrooms. However, each school will need a space for the enrichment instruction, which is part of the new program model. This instruction is approximately two to four hours per week of small group (fewer than 10 students at a time) instruction. This space could be a shared classroom, library or other space. In the transition schools, it has worked well in a shared space such as a STEM lab or other flexible space.

170	Corbo	Scheivert	1/27/20

**Please provide your overall IT equipment plan with itemized costs per school starting from FY16, 17, 18, 19, 20, 21, 22 including into the future as far as you have planned. The board should be able to see what schools have been refreshed, the schedule, lifecycle, and cost.**

The information is provided on the following pages.

Summary of Device Expenditures Since FY16

FY16	Instructional Devices	\$6,803,666
	Loudoun Creates	\$1,084,751
	3.6 to 1 True-up	\$427,940
FY17	Personalized Learning and Loudoun Creates	\$5,723,807
	3.6 to 1 True-up and Refresh	\$5,054,981
FY18	Personalized Learning Expansion	\$1,404,208
	Loudoun Creates Expansion	\$1,406,558
	FY19 Instructional Device Deployment	\$11,022,345
	Teacher Devices	\$4,655,671
FY19	Instructional Devices	\$6,200,069
	Admin Devices	\$2,083,386
	Teacher Devices	\$2,718,914
FY20	Instructional Devices	\$9,105,022
	Admin Devices	\$909,234
	Teacher Devices	\$1,107,108
	Collaboration Monitor Refresh	\$4,159,827

Funding came from both FY18 and FY19 (Expedited first year of 1:1 devices)

To date  
Estimated spend for Spring 2020.

Notes:

In FY16, FY17, and FY18 Admin devices were replaced throughout the entire year. Project plans and other documentation is not available.

This file summarizes project-based efforts and does not capture smaller projects or normal replacement and additional device purchases that are made throughout the year.

Loudoun County Public Schools  
FY21 School Board Questions  
January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
171	Corbo/Sheridan	Scheivert	1/27/20

**Please provide the refresh schedule for Steuart Weller. Did they receive their projection boards on the end of life schedule, or did they jump ahead of the scheduled plan for the school (Corbo)? Provide the refresh schedule (Sheridan).**

Steuart Weller was refreshed in the summer of 2019 in accordance with the published schedule on the following pages.

**Synopsis:**

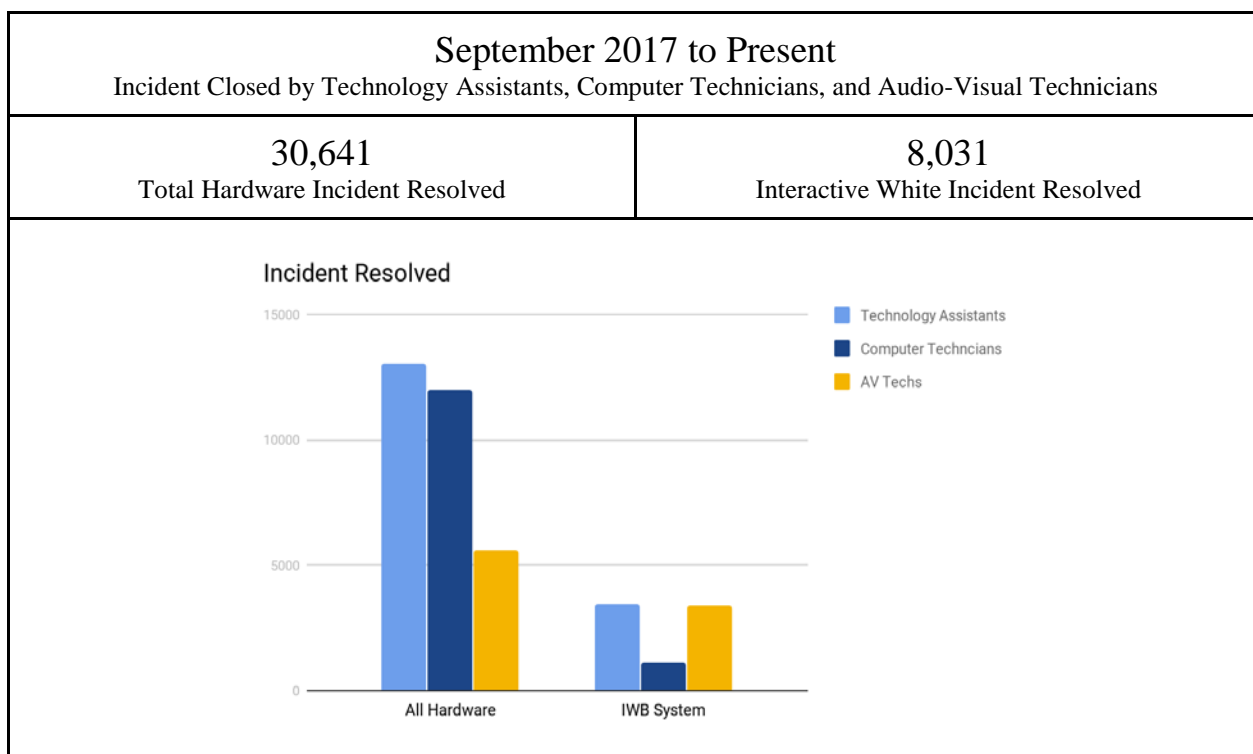

The school division plans to refresh the classroom technology that includes projectors and interactive whiteboards throughout LCPS. The solution as proposed allows the school division to increase instructional engagement at all levels while implementing a sustainable financial and maintenance plan. The introduction of touch-enabled devices for teachers and students has initiated a change in the educational landscape. The shift allows teachers and student to leverage the mobility of the learning devices while still enabling connectivity to a large collaboration monitor that is necessary for whole group activities. At a 5-year cost of \$9,584,100 this classroom technology refresh provides a dramatic cost savings over the previous model which would cost between \$17,000,000 and \$20,000,000.

**Issue:**

LCPS began utilizing “end of year” funding to purchase classroom technology including projectors and interactive whiteboards in 2007. Since this action took place prior to the creation of a formal technology department, systematic funding was not provisioned to account for the ongoing replacement of this classroom technology. In later years, funding was provided in an effort to maintain the classroom technology, but it is not adequate to sustain a replacement cycle.

The school division continues to modernize teacher, student, and classroom technology. The current classroom technology is now beyond the reasonable lifecycle and the costs to repair the devices outweigh the useful life. The issue is amplified by the need to utilize a series of adapters as we attempt to connect new computers to 12-year-old technology.

At this stage in the lifecycle of the devices, nearly 75% of the district’s classroom display technology is considered obsolete and is no longer supported by the manufacturer. This means that the district cannot reliably obtain repair parts or peripherals, such as the touch pen, from the manufacturer, effectively making the device non-functional and increasing the instructional downtime staff and students endure when one of these outdated devices fail.

**Proposed Solution:**

Building on work conducted in 2016 by the Department of Instruction and the Department of Digital Innovation about the needs and capabilities necessary to deliver robust instruction, the Department of Digital Innovation has proposed a 5-year plan in which the district dedicates a small amount of annual funding to refresh classroom display devices and continually adapts the classroom technology configuration based on the best technology available which meets the financial and instructional needs of the division.

Neither solution will result in the loss of access to currently utilized interactive tools such as ActiveInspire or Flip Charts. Additionally, both solutions will still retain interactivity either directly through the classroom display or through newly deployed Lenovo touch screen teacher or student devices.

**Elementary Solution**

The proposed display solution for elementary schools has been specifically customized to meet the needs of our elementary staff and students. Interactivity has been provided to meet the instructional needs where multiple touch inputs and small group instruction is the norm. A mobile stand has been recommended so that the teacher can capitalize on the added flexibility and position the display to best suit the instructional needs of the current curriculum and support the small group instruction often provided in the elementary setting.

**Elementary Specs (\$2,350 per classroom)**

65" to 75" Interactive flat panel  
Mobile, height adjustable mount

**Secondary Solution**

The proposed secondary display solution has also been built with the unique needs of our secondary staff and students in mind. Secondary curriculum tends to not focus as much on small group instruction and display interactivity is often limited to a single user. A non-interactive display will provide the large group display capabilities and interactivity will be provided by the Lenovo, touch screen enabled, teacher and student devices. Wireless display capabilities will allow the teacher to move about the classroom while maintaining control and interactivity with the classroom display. A fixed wall mount solution is preferred as secondary classrooms tend to be limited on space where a mobile stand would be burdensome and inefficient for teachers to manage.

**Secondary Specs (\$1,950 per classroom)**

70" to 75" non-interactive flat panel  
Fixed wall mount  
Wireless presentation with interactivity @ device

The streamlined modern approach to classroom display will significantly reduce new construction costs and reduce classroom infrastructure complexity.

Each proposed solution ensures that staff and students retain current functionality and capitalizes on modern technology advancements to gain added flexibility, increasing the effectiveness of instruction provided by LCPS staff.

**Proposed Technology and new Lifecycle**

The expected useful life of flat panel displays is approximately 10 years versus the 5 years estimated for projection technology. While projectors can often provide a much larger display, the image does not always display colors correctly and is often "washed out" due to sunlight.

Interactive projection technology requires very precise installation steps to ensure the interactivity works correctly to start, and then the projector requires recalibration each time a device connects. Flat panel displays are easily mounted and does not require special setup or calibration. Flat panel displays can be quickly replaced due to the ease of installation and setup.

### **Proposed Replacement Schedule and Logistical Information**

Beginning this year, work will begin to refresh the classroom technology. The services included in this proposal include the delivery, setup, configuration, and installation of each classroom display. This proposal does not include funding to remove existing IWB technologies and other infrastructure built into the classroom. The Department of Digital Innovation will collaborate with the Department of Support Services to coordinate the removal of IWB technologies and the associated facility repairs.

# Technology Enabled Instruction

Educational Technology **Enables** and **Deepens** instruction and learning

## Enabling Instruction and Learning

### Spring/Summer 2018

Getting Started

- Devices & tools
- Personal Productivity
- Classroom Management

### Fall 2018

Designing Effective Digital Learning Experiences

## Deepening Instruction and Learning

### Spring 2019

Increasing Authenticity and Agency through Technology

Digital Citizenship and Data Privacy

# Program Overview

---

## Goal

- To provide all students with contemporary digital tools that will allow them to maximize the learning environment.
- Provide every student in grades 3 through 12 with an individual learning device
- Kindergarten through 2nd grade maintain a 3 student to 1 computer ratio
- Speciality labs remain in secondary schools
- Provide every teacher with a laptop to facilitate teaching and learning

# Maximizing the Learning Environment

---

Reliability of the device paramount and other digital tools must empower students and teachers

Contemporary tools must promote a flexible/mobile learning environment

Ensuring access for all students

Enable all students to be producers of digital content not just consumers

# Individual Learning Device Timeline

## SPRING ACTIONS

### April

- Petting Zoos held and feedback gathered regarding device selection
- Initiate procurement for teacher and student device for 23 schools

### May

- Roll-out new laptops to teachers

### June

- Remove all equipment set to be recycled as part of refresh

# Individual Learning Device Timeline

## SUMMER ACTIONS

### July

- Initiate procurement student device for remaining 23 schools in wave 1
- Prep schools for new devices

### August

- Hold Informational Meeting for parents
- Rollout device to students based on building needs

# By the numbers\*

Previous Student Computer Refresh Model

Cycle	5 years
Number of Devices	12,500
Student to Computer Ratio	3:1
Number of Schools	16
Annual Total Cost	\$10,325,000

New Student Computer Refresh Model

Cycle	4 years
Number of Devices	22,000
Student to Computer Ratio	1:1 Grades 3-12 3:1 K-2
Number of Schools	23 (46 in the first year)
Annual Total Cost	\$10,525,000

\* Numbers are approximate cost models based on school enrollments.

# Teacher Devices

## Lenovo Thinkpad L380

- 2-in-1 form factor
- 13.3" FHD Display
- Touchscreen w/ stylus
- i5 processor
- 8GB RAM
- 128GB SSD
- Up to 12 hours battery life
- ~3.5lbs

## Misc

- USB C Dock vs. USB C Travel Hub
- Stays with the teacher from school to school until time for upgrade

# Student Devices

15

## Lenovo 300e Chromebook

- 2-1 form factor
- 11.6" HD Display
- Touchscreen w/ "pencil touch" (Gorilla Glass)
- MediaTek processor
- 4GB RAM
- 32GB eMMC
- Up to 10 hours battery life
- ~3.5lbs

## Lenovo 11e Yoga (Windows 10)

- 2-1 form factor
- 11.6" FHD Display
- Touchscreen
- Celeron
- 8GB RAM
- 128GB SSD
- Up to 10 hours battery life
- ~3.5lbs

# Elements of Success

---

Refining School Board policy and administrative practices to support a digital learning environment

Creation of student led helpdesks at each school

Bootcamps for teachers and students which provide a foundation of responsible use of the laptop and it capacity

Continual communication with staff, parents, and students about the roll-out

# Administrative Considerations

---

Transitioning from Acceptable Use to Responsible Use Policy

Creation of a Laptop Responsibility Form

- Addresses take home privileges, care of the devices, and consequences of intentional damage/loss

Establishing Norms for device use and content filtering

- Developing universal understanding when it is appropriate to restrict access and create a defined review process

# Questions or Clarifications

### Overview

The Individual Learning Devices computer refresh model will provide each student in grades 3 through 12 with a Chromebook for their use in school and at home.

In year one, we are accelerating the new refresh model by combining the FY18 and FY19 computer refresh funds. Forty-six schools will receive individual learning devices starting in the 2018-2019 school year. Twenty-two schools will receive individual learning devices the following year. The remaining schools will receive the devices the third year. The individual learning devices will then be replaced on a four-year replacement cycle. A secondary benefit to this replacement model is that nearly all devices division-wide will be refreshed a full year earlier than the previous refresh model.

### Devices for Teachers

Approximately 3500 of LCPS instructional staff have been issued laptops to facilitate instructional and operational functions as computer refreshes have been implemented. By the end of May 2018, DDI will provide the remaining teachers with laptops to be used at home and work. No staff laptop will be collected over the summer. Teachers will have access to them to plan and participate in summer professional opportunities. The computing needs of other staff will be evaluated next school year.

### Students in Kindergarten through Grade 2

As part of the refresh, elementary schools will receive approximately one device for every three students in kindergarten through grade 2. These devices will be for use at school, not at home. The devices will be grouped in classroom sets housed in specific classrooms. For example, a classroom set of 7 devices would be housed in a grade 1 classroom of 21 students. Classroom device compositions may vary based on feedback from principals and instructional staff.

### Secondary School Specialty Labs

Specialty computer labs that operate at the secondary level and require specialized equipment to serve students in courses such as Career and Technology Education, digital graphic arts, and video production, will be maintained and included in the new refresh model.

### General Use Computer Labs

Traditional computer labs intended for check-out use at the elementary and secondary levels will be repurposed. LCPS will consider creating digital production labs, engineering pods, tinker spaces, fabrication spaces, and other options.

### How is it possible to make this shift?

To maintain a 3.6 students to 1 computer ratio, the school division needed to purchase roughly 7,000 student computers a year. A 3.6:1 ratio was not meeting the learning needs in our schools. For the past two years the division augmented the 3.6:1 ratio with the purchase of additional devices for programs like Loudoun Creates (2500) and Personalized Learning (3000) annually. This caused the number of devices procured to increase to 12,500 annually. Because of the model, LCPS had to spend money on other items like charging carts and other ancillary systems to house/charge the devices while not in use.

DDI went through a number of budget assessments to gain a full understanding of the true costs of our “old” refresh cycle. Based on the budget required to continue to support the “old” model, we had the opportunity to ask, “what if?” What if we thought every student needed to have access to robust digital learning tools? What if all students were able to create and communicate in digitally rich ways? This series of “what if?” scenarios led us to ask, “why not?”

Utilizing our current financial capacity as a base, we assessed the current device offerings and assessed the computing capacity that was required to meet our goal of providing all students with an individual learning device. This led to our decision to procure a less expensive model for daily use. In the previous model the base amount of a lab computer was \$850 per student device, and in the new model the device price point does not to exceed \$350 a device. That lower cost, along with the reduction of items like computer carts, allows us to adopt a new, cost neutral computer refresh model.

### Device Selection

DDI assessed and selected a series of devices that had the capacity of meeting the needs of the students and staff in the school division. Over the past couple weeks, DDI held a series of informational meetings in schools in each planning zone. These meetings had the format of a visit to an educational Petting Zoo. The Petting Zoos included overviews of the device, benefits of the device, a demonstration, the opportunity to try out the devices, and a question/answer session. Additionally, DDI recently sent out survey to all staff for any final considerations.

### Other Aspects of Refresh & Other Expenditures

Computer refreshes will still include providing schools with technology peripherals like docking stations and monitors where appropriate.

Since the new machines will be used as Loudoun Creates devices and personalized learning devices as those programs expand into new schools.

Schools will retain computers purchased with PTA funds, PTO funds, and school-level funds, as well as Loudoun Creates iPads, for the length of their life cycle as determined by the Department of Digital Innovation.

FY21 School Board Questions  
January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
172	Corbo	Scheivert	1/27/20

**Provide the pilot program conducted including the timeline and feedback for the removal of the dedicated AV, with the “obsolete” promethium and Lenovo?**

This question was previously answered as part of budget question 92 on January 24, 2020.

Here is that response:

In following Deming’s process of Plan Do Study Act, DDI initiated a series of mini pilots that culminated in two large scale pilots. The mini pilots were designed to evaluate technologies in isolation and grew in scale and complexity. Pilots occurred at Dominion High School, Broad Run High School, Mercer Middle School, and Guilford Elementary School. Along with the school-based pilots there was continuous testing at the Staff Training Center. The two pilots that occurred at scale occurred at Loudoun Valley High School and Belmont Station Elementary School.

173	Corbo	Scheivert	1/27/20
-----	-------	-----------	---------

**Provide the pilot program conducted in the secondary schools with the non-interactive projection boards.**

Research on the evaluation of the school division’s readiness to provide every student with a learning device and providing every teacher with a laptop can be found on the Research Department’s web page in the 2013-2014 section: <https://www.lcps.org/page/1997>.

When implementing the classroom display refresh, DDI followed Deming Cycle of Plan-Do-Study-Act. DDI initiated a series of mini pilots that culminated in two large scale pilots. The mini pilots were designed to evaluate technologies in isolation and grew in scale and complexity. Pilots occurred at Dominion High School, Broad Run High School, Mercer Middle School, and Guilford Elementary School. Along with the school-based pilots there was continuous testing at the Staff Training Center. The two pilots that occurred at scale occurred at Loudoun Valley High School and Belmont Station Elementary School. Since the pilots were part of the implementation process no formal report was developed. Each mini pilot informed the next iteration.

Loudoun County Public Schools  
FY21 School Board Questions  
January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
174	Corbo	Scheivert	1/27/20

**Provide the pilot program conducted in schools with the wireless connections and the non-interactive boards.**

In January of 2017, the Department of Technology Services (DTS-currently the Department of Digital Innovation), the Department of Instruction (DOI), and Support Services convened to discuss feedback provided during the Interactive Technologies Focus group meeting and if any other developments occurred since the last meeting. The focus group provided a comprehensive perspective of the current uses of the Promethean boards both interactively and projection only, potential technology uses, and effect on student learning. There was also a poll conducted with other school divisions that resulted in a variety of options that were consistent with our reviewing and vetting process.

DTS, DOI, and Support Services discussed the utility of interactive white boards (IWB) segmented by grade level, the impact of additional devices through personalized learning, Loudoun creates, and the 3.6:1 student to computer ratio. Also discussed, how could be leveraged and integrated in the classroom to support learning while balancing the cost considerations. The committee made the following recommendation.

Initiative	Elementary	Middle	High
Projector Refresh or replacement	Interactive projector and whiteboard	Interactive projector and whiteboard	Interactive projector and whiteboard
New Schools	More study required for elementary usage	Standard projector, whiteboard, additional Mobile devices	Standard projector, whiteboard, additional Mobile devices

The specification for new schools was modified in 2016 to include Interactive Projectors by EPSON for all new construction. There was no budget consideration given to replace the obsolete boards.

Building on work conducted in 2016, the Department of Instruction and the Department of Digital innovation designed a new platform that provided interactivity at all levels and increased the collaboration capabilities of the once static displays. DOI and DDI believe the new interactive capabilities necessary to deliver robust instruction. In 2019, the Department of Digital Innovation began a 5-year plan to refresh classroom display devices which meets the instructional and financial needs of the division.

Loudoun County Public Schools  
FY21 School Board Questions  
January 30, 2020

Item Number	Board Member	Staff Assignment	Date of Request
175	Corbo	Scheivert	1/28/20

**Please explain the 3.6 to 1 model share.**

In accordance with this model, the division provided 1 computer for every 3.6 students enrolled at a school.

176	Reaser	Scheivert	1/28/20
-----	--------	-----------	---------

**If we were to consider Promethean boards or (other technology equipment) for High School math – Can we get an idea of how many would be needed and what that cost would be so we can have a conversation about that possibility?**

The Department of Digital Innovation and the Department of Instruction will collaborate to assess the needs of the secondary mathematic teachers. Including \$700,000 in the FY21 proposed budget would provide funding that would assist with this effort. Staff would update the School Board before plans are finalized.

177	Barts	Scheivert	1/28/20
-----	-------	-----------	---------

**Is it possible to have two separate classroom technology plans at the secondary level?**

Yes, as explained in question 176, including \$700,000 in the FY21 proposed budget would assist in this effort.

178	Beatty	Scheivert	1/28/20
-----	--------	-----------	---------

**Could you explain the Enterprise Support Specialist and the Analytics Specialist and how those staffing standards came about?**

DDI explored using industry best practices from APQC, Robert Half, and Gartner as some examples, to determine the appropriate staffing levels for each role based on systems and population supported. The recommended ratio was 1:10,000 which did not account for size of application or role of FTE. Additionally, if LCPS adopted those ratios we would be asking for seven additional FTEs versus the two we requested.

Enterprise Support & Analytics provides implementation, training, support, and enhancements to division-wide solutions that are used by students, parents, and staff.

**178 (continued)**

Most staffing standard formulas are student-based. This would exclude the other large groups such as parents and staff.

Enterprise Support and Analytics team has 5 Enterprise Support Specialists (ESS) and 4 Analytics Specialist (AS) currently. This staff of 9 has very different skill sets and responsibilities and should not be comingled. The roles of each are described below.

There are 4 Analytics Specialists in DDI. Each Specialist has subject matter responsibility and state reporting responsibility for specific areas. The growth in student enrollment has led to additional students, staff, programs to track, and more opportunities to ensure that our enterprise wide student data is kept clean. In addition to growth in enrollment, the scope of data that is stored in the SIS continues to grow each month as our stakeholders request fields and automation of existing paper processes, and additional growth in data collections from the VDOE that are fulfilled by DDI on behalf of other LCPS departments. Lastly, the number of system integrations served by this office has grown exponentially during the past 3 years alone moving from 5 applications to more than 50 currently.

There are 5 Enterprise Support Specialists in DDI. The results of the annual survey indicate a strong need from schools to provide onsite support, and to model the approach used by other departments who use Instructional Facilitators for ongoing, embedded, professional development. This position supports staff, parents, and students with a number of applications including parent/student portals, Phoenix, Blackboard suite, Qlik, Permission Click, Schoology, and custom web solutions such as summer school registration and Academies applications. As roles have changed for both the IFT and the Digital Experience Specialist, gaps in support exist that need to be filled by this position. The need for ongoing professional development and a highly responsive support model is essential.

**Where did the 95% number for Parent View come from? Would like to see the data that goes into that statistic.**

**ParentVUE Statistics**

Number of students with at least 1 activated parent	81,073
Total number of students	84,615
Percent of students with at least 1 activated PVUE account (81,073/84,615)	95.81%

**How are the mentors mentioned in the presentation selected?**

Teachers who wish to serve as mentors apply to the building principal. In collaboration with the lead mentor, the principal selects teachers to serve as mentor teachers. Once selected, mentor teachers attend training provided by the Mentoring and Coaching Office within HRTD. The principal and lead mentor work to pair mentors and new teachers based on teaching assignments and building needs. The mentor provides ongoing support, advice, and inculturation throughout the new teacher's first year in a relationship outside the evaluation process.

**Explain the difference in the budget expenditures on page 147 of HRTD of almost \$1,000,000, but the budget presentation stated the change is only \$0.2 million.**

The changes that were captured in the budget presentation result from the addition of a new position and increases to operations and maintenance. The additional changes on page 147 of the budget book are changes in personnel costs. A key driver in the HRTD personnel costs relates to mentor stipends that were previously partially grant funded and were included in the Non-Departmental budget.

**Provide the impact on the proposed budget of capping pay raises at 5% and capped at 6% (two estimates). These percentages should include all compensation increases including scale adjustments, step increases, 1% market adjustment, and classification reviews.**

The FY21 proposed budget includes several initiatives related to salaries. Two of these initiatives have been identified that would be impacted by the cap: the Pay and Classification Review initiative and the teacher salary scale restructuring.

Projecting the impact of pay raises proposed during the Pay and Classification Review presents several issues:

- The proposed FY21 budget designates \$1.7M to fund the next cycle of the Pay and Classification review. The review will occur in the fall of 2020, and the requested projection would be based on incomplete data and may fall outside of an acceptable margin of error.
- The goal of the Pay and Classification process is to base LCPS salaries on current market conditions. Capping raises before the completion of the review may result in salaries that remain below the market after adjustment.

Capping teacher pay increases by 5% would result in a savings of \$33.1m and capping at 6% would result in a savings of \$26.7m. Implementing a 5% or 6% cap would not allow LCPS to meet all of the desired outcomes in the approved Competitive Salaries Strategic Action.

Enacting either of these salary scales results in a scale that:

- loses ground in market competitiveness for the Bachelor's Median and Master's Median metric;
- includes no adjustment for step 30;
- has inconsistent steps;
- and specifically for the scale capping pay increases to 5%, includes a minimum pay increase of only 0.2%.

**Please provide school MAP data for the three schools in the immersion program for the past five years (follow up to question 121).**

We have MAP data for all three Computer Science Immersion schools for 2018-19 only, which was the first year we implemented MAP for all elementary and middle schools.

The table below provides Fall to Spring student growth data for Reading and Math for the CS schools.

*FYI: The division averages for the elementary schools were 51.03 for Math and 51.68 for Reading.*

<b>Question: What is the conditional growth across the schools?</b>
