With English learner percentages continuing to rise, what will the Eastern Loudoun Student Welcome Center do?  How are families supposed to get to it?

The Eastern Welcome Center will offer the same services the Welcome Center currently provides in its temporary location, including registering students who are registering with a language other than English or with international transcripts. Families have been travelling to the Welcome Center’s current, temporary location on the 5th floor of the LCPS administration building for almost 5 years; therefore, we do not anticipate any challenges by moving the center closer to where the majority of our families live. In fact, staff anticipates that families living in the eastern part of the county may have more modes of transportation than are currently available (e.g. walking and public transportation). More information regarding the LCPS Welcome Center and the support it provides families can be found at [www.lcps.org/WelcomeCenter](http://www.lcps.org/WelcomeCenter).
