

Loudoun County Public Schools (LCPS) performs regular inspections of school buildings and facilities in accordance with the Environmental Protection Agency (EPA) Asbestos Hazard Emergency Response Act (AHERA). As required by the Commonwealth of Virginia and the EPA, this notification is to inform you that asbestos-containing material (ACM) is present and managed in several locations in Broad Run High School.

Prior to the 1980s, asbestos was used extensively in many building materials because of its insulating, sound-absorbing, and fire-retarding capabilities. While virtually any building constructed in the United States from the 1940s to the late 1970s contains some asbestos, intact and undisturbed asbestos-containing materials generally do not pose a health risk. It is important to note that when managing or mitigating ACM, schools are held to a higher standard for management than residences or privately owned buildings.

In our school, known areas of ACM are inspected semi-annually by licensed LCPS personnel and every three years by licensed third-party inspectors to ensure that the material does not pose an exposure hazard for building occupants. Any materials found to be in unacceptable condition or impacted by planned building work are removed by licensed professionals. Records of all inspections, response actions, and sampling data are compiled in the school's Asbestos Management Plan document. This document also indicates the locations where asbestos-containing materials may be present.

In 2022-2023, the following inspections and response actions were performed:

- December 2022 Removal of 3 wall-mounted mirrors and associated mastic, Weight Room
- February 2023 Periodic Visual Surveillance, All Known ACM
- August 2023 Removal of 9 square feet remnant wall mirror mastic, Girls PE Teacher Office Restroom
- August 2023 Periodic Visual Surveillance, All Known ACM

Members of the community can review a copy of any school or facility's Asbestos Management Plan, which is kept in the school or facility's administrative office. In addition, copies of all Management Plans are maintained in the Loudoun County Public Schools Facilities Services Environmental Division offices, located at 741 Miller Drive, Leesburg, Virginia. For all inquiries regarding the asbestos management plan and asbestos-related issues in our facilities, please contact the LCPS-designated asbestos program manager, Cristina Windover, at Cristina.Windover@LCPS.org or 571-420-0513.

It is LCPS' intention to comply with all federal and state regulations regarding asbestos and to take whatever steps necessary to ensure students and employees have a healthy and safe environment in which to learn and work.

Thank you for your attention to this important issue.
