

Name: _____

Test Date: _____

Money Study Guide

1 dollar bill

= 1 dollar, \$1.00

quarter

= 25 cents, \$0.25

dime

= 10 cents, \$0.10

nickel

= 5 cents, \$0.05

penny

= 1 cent, \$0.01

***Remember, always count bills and coins from greatest value to least value (bills, quarters, dimes, nickels, pennies for example).**

***Make sure you line up the decimals (and therefore, the place values) when adding or subtracting money amounts. Don't mix dollars and cents!**

Complete the practice problems below to help you study for your test.

Count the following bills and coins. Write the amounts next to each group of money.

1.  _____

 _____

2.  _____

3.  _____

How much change should the following customers receive? Show your work.

4. Mr. Brown bought a soda for \$1.35. He paid with a 5 dollar bill.
