What most children are doing

Age 4

Can use future tense

Speak clearly

Can tell a simple story using full sentences

Age 5

More likely to agree with rules

Want to please friends

Want to be like friends

Can tell what’s real and make-believe

Sometimes demanding / sometimes cooperative
What is behavior?

- Observable actions.
- Functional to meet a goal or need
- Form of Communication
- Developmental skill that can be taught (the child may not know what is appropriate)
- Learned: it has been effective (in meeting the child’s need) or reinforced
FACTORS THAT INFLUENCE BEHAVIOR

PHYSICAL

MEDICAL

SENSORY DIFFERENCES

DEVELOPMENTAL STAGE

INDIVIDUAL DIFFERENCES AND TEMPERAMENT

FAMILY CULTURE
All children demonstrate negative behaviors sometimes.

Negative behaviors become more problematic as they occur more often and are more intense.
Typical Behavior Concerns in Preschoolers

- Frustration
- Physical expressions of anger
  - Yelling, crying, tantrums, holding breath, throwing
- Crying at separation
- Saying “No”
- Not sharing
The World of Toddlers

Want to explore the world without the skills to handle it.

- Underdeveloped language skills
- Parents are beginning to tell them “no”
- No experience to draw from
- Underdeveloped frontal lobe (responsible for planning, logic, reasoning, working memory and self-control)
  - No sense of time and patience (wanting is needing)
  - Skewed sense of cause-and-effect (fear of bathtub, they could go down the drain)
  - Fear their parents will abandon them
- Poor problem solving skills
- Can’t identify and label the emotions they are feeling
Toddlers are living in the moment. Their world is amazing and terrifying and frustrating and unpredictable.

Toddlers - What can you do?

● Remain calm
● Remember that YOU are the adult
● Talk about it afterwards (validate their feelings)
● Try to head off tantrum -triggering situations (more on this later)
  * make sure he is getting enough rest
  * make sure she/he is NOT hungry
  * give a “heads up” before transitioning
  * watch how much you say NO
  * watch for signs of overstress
What if adults acted like toddlers?

https://www.youtube.com/watch?v=mZI_rCJtTsg
As children develop, behaviors tend to serve a function. Figuring out the function of your child’s behavior will help you figure out how to respond.

What does this behavior do for your child?

What does your child get in return for this behavior?
Consider one specific behavior you want to change.
Typical Functions of Behavior for Preschoolers

- Attention
- Revenge
- Power/Control
- Escape/Avoidance
- Learned Helplessness
Function: Attention

https://www.youtube.com/watch?v=NM8vKTFbMZM
Antecedent -> Behavior <- Consequence

You can’t directly change behavior.
What can you do?

Prevent the behavior by changing what happens before.

Decrease the behavior by changing what happens after.
Example:

**Antecedent:** Child is told they can’t watch TV.

**Behavior:** Child screams and has a tantrum.

**Consequence:** After a few minutes, parent turns on the TV.
Prevent

- Create family rules and clear expectations
- Change how you give instructions
- Give choices
- Change the environment
- Prepare your child for transitions or changes in routines
- Teach coping strategies
Prevent: Family Rules

- Be responsible (help clean up messes/toys)
- Be respectful (use manners, share, be kind to others)
- Be safe (hold hands on walks, stay on the sidewalk, climb down carefully from high structures)
Prevent: Set clear expectations

- Use “I need” language
  - I need quiet in the car, so I can think about driving.

- Add descriptions of things they CAN DO
  - You may quietly look at books in the car.

- Let them know the consequences ahead of time
  - If you are loud, I will stop driving until you are quiet.
Prevent: Change how you give instructions

- Use short, single step directions
- No trigger words (e.g. no, don’t, stop)
- State in positive terms or what you want your child to do and not what you want your child to stop doing
- Tell, don’t ask
- Build direction into routine (after lunch we’re going to..)
- Use first/then (first you pick up, then we can have snack)
- Use choices
- Give extra prompts or cues
Prevent: Provide Choices

The Magic Wand

- it is a WIN-WIN solution
- Offer limited choices

“It’s time to take a bath....Would you like to go on your own or would you like to be carried?”
Prevent: Change the Environment

- Create a routine (Mealtimes, Bedtimes, Going out)
- Organize or structure the situation (new or change)
- Keep items kids can’t have out of reach
- Provide appropriate toys, rotate toys
- Provide a variety of play locations and types of play
- Build in structured games
- Offer motor breaks
- Meet sensory needs
Prevent: Prepare for Transitions

- Warnings
- Reminders
- Picture schedule of day
- Visual Clock (hourglass or iPad)

*Takes ownership off of parents*
Prevent: Teach Coping Strategies

- Identifying feelings (emotion faces)
- Identifying level of escalation
- Deep breathing
- Sensory items

Take a deep breath and be calm.
Smell the flower
Blow out the candle

![Emotion Faces]

![Sensory Items]

![Chart]

1. Happy, Calm, Satisfied, Pleased, Okay
2. Nervous, Worried, Anxious
3. Frustrated, Confused, Annoyed, Sad
4. Angry, Mad
5. Rage, Furious
Prevent: Cozy corner

- Have your child take ownership
- Post coping strategies on the wall
- Child can go on their own as needed to regulate themselves
- Child can be gently guided to calm
- This area should **never** be used as punishment
Tips to help with Daily Routines

- **Dressing**: give choices, assist and encourage their help
- **Meals**: give choices, turn off TV, don’t force, encourage trying new things and increasing eating independence
- **Bathtime**: have fun, my turn/your turn
- **Bedtime**: be consistent with routine
Even with the best laid plans, inappropriate behaviors can still occur.
Responses to Behavior

Stay Calm: be in control of your own emotions

Response must be consistent with the function of the behavior.
Responses

- Sit, Watch: remove briefly to watch appropriate play
- Praise the appropriate behavior of others (child/behavior specific)
- Ignore the behavior (if not causing harm)
- Interrupt and Redirect (time-in): guiding to desired behavior
- Logical and Natural Consequences
- Time-out
- Manage tantrums
- Use a behavior chart for a visual marker of success
- Reward Positive Behaviors
Responses: Ignoring Behaviors

- **Works best when the function is attention**
- Inform your child that you will wait until they are finished, then **give NO attention for misbehavior** (no looking or talking at/about the behavior)
- Do not use for aggressive or dangerous behaviors (causing harm to self/others or damage of property)
- Combine with rewards for positive behavior. **Ignore the negative behavior while immediately reward the desired behavior.**
Responses: Logical and Natural Consequences

Logical consequence: something created by the parent, related to the behavior
- The toy will be taken away for the day if it isn’t played with appropriately.

Natural Consequence: something that happens on its own
- A toy might break if your child hits it.
Responses: Time-Out

- Don’t use time out if the child’s goal is avoidance.
- The number of minutes is determined by the age.
- Time-out should be in a consistent area (not cozy corner).
- Do not interact with the child during the time out.
- If child leaves time-out, gently/quietly lead them back.
- A child should be welcomed back after the time out: always talk about what to do different next time.
Responses: Managing Tantrums

- It is ok for your child to be angry.
- Allow the tantrum behaviors to play out on their own, as long as your child is safe.
- It is important for children to learn how to express anger appropriately.
- Reasoning with a child *during* a tantrum DOES NOT WORK.
Response Curve

Stay Calm

- Peak (no talking or redirection)
- Encourage to Relax (no demands)
- Support (no talk of incident)
- Calm Redirection
- Redirect (away from stress)
- Leave (anxiety event)
- Model (calming strategies)

Teaching Strategies

Teaching Strategies
Responses: Reward Positive Behaviors

- For every response to a negative behavior, provide 4 responses to positive behaviors
- Talk about the positive behaviors you want to see. Point them out frequently and consistently
- Praise and reward the behaviors when you see them. Be specific about what you are praising
- **Praise the behavior and not the child.**
- Use verbal or non-verbal (high-five, hug, smile) praise
Use Behavior Specific Praise

*Identify and define both your child and the behavior*

- Praise the completion of a task
  
  “You put all the toys away!”

- Praise your child when they show a talent
  
  “You built a great tower with your blocks.”

- Praise positive character traits/following family rules
  
  “That was responsible/respectful/safe when you ...”
  
  “That was helpful/kind/considerate when you ...”

- Praise for resisting negative behavior
  
  “I like the way you walked with me on the sidewalk.”
Consider a Reward (Behavior) Chart

- focus on one to two behaviors you want to see
- make time frames short (adjust as needed)
- remember developmental expectation and thinking skills
Tangible Rewards

- Can be an object or a privilege
- Use only with specific behavior and reduce when behavior goal has been met (toilet training)
- Offer reward immediately
- Avoid extravagant rewards
- Rewards may need to be modified frequently to peak interest
- NEVER take away earned rewards
- Decrease as behaviors are learned.
Possible Privileges

- Going to the park
- Playing with a special toy
- Getting a piggyback ride
- Having a bubble bath
- Watch a special movie
- Making a special treat
- Having a picnic

- Going out for special treat
- Going on a special errand with mom or dad
- Helping choose an activity
- Helping parent with grown-up task
- Riding a bike with parents
- Playing a game with parents
Give it time to work.

Be consistent.

Don’t be discouraged if the behavior worsens before it gets better.
Remember

Praise works better than error correction

Catch your child being good

Use consistent and frequent praise

Use behavior specific praise
Positive responses for good behavior increase frequency of good behavior.
Homework for Parents

Pick an hour a day watching/playing with your child and look for 10 positive behaviors to praise.
How to Contact Child Find

Child Find Office
20 Union Street NW
Leesburg, VA 20176
571-252-2180

Go to LCPS.org, click on the PARENTS tab, then find the link to Child Find
Upcoming Presentations

January 16, 2019 9-11am:
Raising Young Communicators

April 3, 2019 9-11am:
Screen Sense for Young Children
Thank you!
