HARMONY HORNET CHALLENGE

Responses from our students
Monday Reflection:
Share something you’ve learned about yourself during our school disruption.
One thing I have learned about myself is I want to go back to school. It's actually really boring at my house I would rather be at school than be at my house. Also it's harder to do work at home than at school.

That I like the spring more than winter.

I have been getting a lot of work done in one day. I try to do half of it in a day sometimes, but my parents say that I need to split it up. I didn’t realize how tempted I would be to get the work done, even though it is optional.

I’ve learned that a lot of games are really fun.

I learned that I know more about Pokémon than others.

I would rather be in a classroom than at home all day.
Something I have learned about myself is probably that even though I don't always like group projects, I still like to negotiate with my classmates and peers. I miss doing that.

What I have learned about myself is I am a very emotional person when it comes to sad stuff in movies, tv shows, and commercials.

What I've learned about myself is that I need to take time with things organize more.

I learned how to just roll with it and also felt sad about the challenge we are facing together.

During our school disruption I have learned that you don't have to completely finish something to feel like you accomplished it.
I learned that small projects are easier to do for me because I feel like you learn a lot more information.

During this disruption from school I have found an enjoyment for longer strategic board games such as a risk and settlers of catan I never knew I did like board games such as these two but they’ve basically been what I’ve been up to these past 2 weeks besides going outside with my family and playing basketball.

During the school disruption, I learned about myself, that I really like school, and that I miss it a lot.

One thing I have found out about myself during this school disruption is that I love to bake.
Tuesday

Critique and Revise:

If you could go back and do something better, what would you revise about your school year?
Sometimes I rush on my homework because I don’t have much time because of other things I have to do, so maybe I could take a little time instead of rushing.

I would do more of the clubs because I started them right when we got out of school.

If I could go back and do something better, I would probably get more involved in school. I think that I was good at doing all of my school work, but I would have wanted to get into more clubs and things like that.
If I could go back and do something better I really wouldn’t want to revise my school year. I loved school this year, because of all the awesome new friends I met in classes along with amazing teachers in each of those classes. And this school year was just awesome.

One thing I would revise about my school year would be making sure I didn’t have any missing assignments that I did turn in but teachers did not put grades in for.

I would do more of my homework in math, because I was always busy doing other things that weren’t related to school, than doing some of my math homework.
I think I would go back and try a little harder on assignments and not goof around as much.

If I could go back and fix something it might be to not procrastinate on my projects. I would fix that because some big projects I would do a little then the day before they were due I would stress out and do it all in one night.

I would go back and listen to my teachers more and focus on my grades.

If I could go back and do something differently I would have tried not to miss so many days of school. And done more projects in Art that weren’t on the computer.
Wednesday

Sustained Inquiry:
Tell us about something you are interested in learning about in your extra time.
I want to learn how to play spikeball because I might get it. Me and brother made a makeshift game of spike ball because we really want it.

I was watching a movie recently, and it mentioned The War Of 1812. I have never heard of that, so I started researching it. What I have learned is very interesting.

I think it would be cool to learn about space because it really cool to me and we didn't get to learn about it in science.

I'm interested in learning more history in my extra time.

I am interested in learning more about pokemon natures in pixelmon (pokemon in minecraft.)
Something I am wanting to learn about during my extra time is a little bit more about the virus. I don’t really know much about the virus but want to just know more about the effects it has not only on people but also possibly animals.

I’m interested in learning more about important events that have occurred in history.

One thing I am interested in learning is how to vinyl, it is basically making stickers out of this material with a cutter.

I would like to learn more about repairing cars.
I think that I am going to be most interested in how online learning works. I have never had to learn like this before so I am interested in how it is going to work and turn out.

I want to learn more about animals and how to study them in real life.

I'm interested in learning about coding and hacking computers for a good cause.

I'm interested in learning more about Norse Mythology because I find it really interesting and I'm also writing a story that involves Norse Mythology so I need to know my stuff

I am interested in learning more about American History.
Thursday

Driving Question:
Share your driving question that you are working on in your spare time.
How can I make my life more fun during the days off. I chose this because it's boring at my house there is nothing to do.

What is The War Of 1812?

How can I learn more when we are doing online school?

My driving question is “How can I use the elements of PBL to help me learn better online”. I chose this because I can still use pbl no matter where I am, so I can use it when I am working online as well.
How can I learn more about animals and how to study them in real life?

What do I need to do to keep myself busy and how so?

“How can learning about other cultures/Mythology help us understand the world and the past more.”

My driving question is: How can I effectively learn online from home?

My driving question is: How can I get better at school on my own and learn new things.
Something I am wanting to learn about during my extra time is a little bit more about the virus. I don't really know much about the virus but want to just know more about the effects it has not only on people but also possibly animals.

My driving question is how is the corona virus affecting the world around me?

Why are some people allergic to poison ivy and others not?

What other important events have happened in history?
Friday

Public Product:
Share something that you’ve created during your time off.
I made a homemade SpikeBall game. Me and my brother want a game called SpikeBall but it cost too much money. So we drew a circle with chalk and used a basketball.

For English, I created a slideshow telling which National Park I would want to go to, with certain options.

My sisters and I have done a lot of big puzzles.

I’ve created a few paintings.

I have created the best strategy for pokemon.
I created a 7 page story with my time off. I like to write stories, but I normally didn't get time to. But now I have so much time, I don't know what to do with it. I like to be creative and I feel like writing stories is one big way you can do that.

During the time off me and my family made a tangram art on our driveway. No clue how that idea came to our heads but it did so yeah.
I have created about 20 sets of earrings and when this Corona thing is over I will sell them.

I am working on reading 20 books during the time that we have off from school and over the summer.

I've created a love for basketball
