

Schoolology in LCPS

Loudoun County Public Schools is now using Schoolology, an integrated learning management solution that provides one-stop access to everything students need for their learning. Schoolology allows students, parents, and teachers to connect and engage, whether learning in school or at a distance. Schoolology will be used in all classrooms to ensure that students can access the resources they need for class and provide families the access they need to support their children.

As a parent, you will be able to login to Schoolology through your existing ParentVUE account. You will be able view course resources and upcoming assignments for each of your children so you can better support learning at home. More information, including information about how to access resources for learning how to use Schoolology, will be shared soon.
